

FROM ONLY 500KG

MORIRIN makes your original color

MocoFilo

POLYESTER DOPE DYED YARN

Dope-Dyed Polyester DTY Filament Yarn

Sustainable

MocoFilo provides ecological advantages, As a result of adding the color pigment directly, dyeing is no longer necessary. Using MocoFilo, energy and water can be saved in comparison to the standard filament.

Features of Dope-Dyed yarn

Eco-friendly

The emission of CO2 is lower than yarn-dyeing and piece-dyeing process and it lowers the damages on the environment.

High color fastness

MocoFilo is long lasting

Advantages of MocoFilo

Color variation

5,000 colors are available and provide your original request.

MOQ 500kg/color

We can make your original color from only 500kg. (Generally MOQ of dope-dyed yarn is 3,000kg ~ 20,000kg)

Two-Tone mottled yarn

Our original production process makes it possible to produce mottled filament yarn that cannot be imitated by other makers.

Color reproducibility

The technical skills of our engineers and our strict quality control standards provides color reproducibility at extremely high level.

Further efforts

More eco-friendly products made from Recycled chips or Bio chips are under development.
